PROJECTS

KUPAN Website Github
- Our website lets users upload and share coupons from their UPI apps, creating a community-driven exchange platform.
- Users can browse, download, and use these coupons, maximising their savings while also finding ones that suit their needs.

PORTFOLIO Website Github
- This is my portfolio, featuring my background, skills, and a selection of my projects. Explore to see my work and how I can contribute to your team or project.

LIBRA Website Github
- Our website allows users to upload and share their digital books, creating a collaborative digital library.
- Users can access and download a diverse range of books, enhancing their reading experience and discovering literature from fellow book enthusiasts.

CUPPY Website Github
- This one here will be an online code snippets provider for the user.
- By using these pre-made code snippets developers can save their time and invest it on something more important.

SOCIO Website Github
- This web application allows users to monitor their social media accounts at one stop.
- Users can monitor their posts likes followers or subscribers and their account reach in this application.
